Sixty Buildings Destroyed by Fire at Nome With Loss of \$200,000.

Fatalities and Accidents Claim Several Victims in and About Seattle.

Rumors of Pending Purchase of Bellingham Bay Line by the C.P.R.

EATTLE, Sept. 18.—(Special.)—
Fire at Nome the night of September 13th destroyed sixty buildings, causing a loss estimated in the neighborhood of \$200,000. It did not wipe out the larger wholesale and retail district, as at first reported. The city hall and small buildings were destroyed, but all the records were saved. The big stores of M. E. Atkinson and J. P. Parker are said to be burned. Information is meagre and the exact fire area is not yet known. Communication has been re-established.

Dime Novel Heroes Play Rough House With Yacht Club.

Chicago, Sept. 18.—With a black flag

Chicago, Sept. 18.—With a black flag flying from its masthead and its occupants armed, a sailing craft appeared off the foot of Thirty-third street yesterday afternoon, and, after a battle with the members of the Doughas Yacht Club, in which the latter were forced to appeal to the police, weighed anchor and disappeared in the direction of South Chicago.

The pirate ship, the police say, was seen by scores of persons on the shore. She dropped anchor less than a half mile out in the lake, and her sailors clambered over the sides into a vawl and were rowed to the yacht club building, carrying rifles and other weapons. The invaders attacked a number of persons who were sitting on the porch of the building. The small boathouse party were finally routed, and telephoned for police aid. As the first of the policemen appeared, the "pirates" hurried to their yawl, rowed back to their yacht and sailed away. The police believe that the pirates are youthful young burglars who live in the district south of Hyde Park.

Among Returning Rusticators.

New York, Sept. 18.—Vacations spent in small farm houses, poorly ventilated, with bad drainage and contaminated water supplies, are declared by several leading physicians about the city to threaten an epidemic of typhoid fever during the autumn. The doctors declare that stringent measures will be necessary to prevent a great amount of sickness from these causes among persons who spent their vacations in the country, supposedly enjoying a change of air and food.

try, supposedly enjoying a change of air and food.

"In the matter of typhoid," said one of the city's best known practitioners last night, "it is agreed that sanitary administration has not kept pace with scientific progress. One reason for this is that the laws are defective. The health authorities have not any power to enforce regulations, and the people as a rule are not educated up to the point of obeying salutary statutes.

"Any physician will tell you contaminated water is the chief cause of the disease, and that in country districts the sunken well and the old-fashioned cesspool, generally in close proximity with the living quarters, produce that cause. "All farm places that take boarders should be required to have a license approved by the health anthorities showing that the place is sanitary and as free from fever as it is possible for any place to be."

Plans for Purchase of Fields in Alberta.

Private information received from Pincher Creek, Alberta, is to the effect that the flow of oil recently encountered by the Rocky Mountain Development Company in its borings at Oil City, some miles south of Pincher, is phenomenal and creating much excitement. It is claimed that the twelve-inch boring is flowing fully three hundred thousand gallons of oil per day, the pressure being so great as to force a stream fifty feet in the air. When the boring had reached a depth of 1,500 feet the oil stratum was streek and oil immediately commenced to flow, the pressure becoming so great as to compel the drillers to cease. Oil gushed out in such large quantities as to flood the immediate surface surroundings of the well to a depth of over two feet.

Great secrecy was maintained about the strike, the idea being to give the Rocky Mountain officials time to get control of all the neighboring land, and in this they have partially succeeded. News of the strike, however, gradually gained currency, and many people have gone into the district for the purpose of of staking land, title to which must be obtained through the interior department at Ottawa.

The flow struck by the Rocky Moun-

obtained through the interior department at Ottawa.

The flow struck by the Rocky Mountain people proved almost too great to handle, and it was with much difficulty that the well was finally capped. The oil is of a high grade, and it is claimed refining can be done without the use of sulphuric acid, effecting a considerable saving in general expense.

### How Oil Is Developed

How Oil Is Developed

Oil has been known to exist in the locality for many years. Oil-timers remember when William Aldrich used to skim the surface seepages and sell the oil to the Mormon settlers for lighting and lubricating purposes. Finally John Limeham, well known around Calgary, got on to the idea and secured expert advice and tests about the oil. On the strength of these reports Lineham secured land covering the seepages and organized the Rocky Mountain Development Company, whose operations have met with such signal success. Were the borings continued to a depth of three thousand feet it is believed the flow of oil would surpass anything ever struck on the continent.

According to the report of the geologists the valley, or "pass," as it is called, is an enormous crevice caused by volcanic cruption, crosscutting the formation of the Rocky Mountains and thereby forming a basin-like vaccum into which the cil—caused from distillation of the large coal bodies lying to the west, seened until it formed vast

the South, by Lottie Blair Parker, at the Victoria Theatre last night. The play, dealing with love and life in the sunny South, was admirably staged, some of the settings being especially good. The play is of the "East Lynne" order, with plenty of scope for those who would shed tears with the unfortunate lady of the black alpaca dress, and for those who would laugh. Laughter followed tears, comedy succeeded tragedy. Miss Laura Wall played the leading role, that of Lelle Crofton, in a manner indicating her to be an emotional actress of no mean ability, and Messrs. J. Griffith Wray, as Steve Daubeny, and M. J. McQuarrie, as Burleigh Mavor, did some good work as the rivals for the heart and hand of the daughter of the South. Miss Carlotta's playing of Aunt Doshey, the colored mammy, was noteworthy, as was that of Miss Millie Evans as Anna Lizer. The costumes of Louislana of thirty years ago, the summery dresses and gay young folk, romping merrily, alded to make the pretty stage settings which are noticeable features of the Dabage Patch,"

# A PRETTY CANADIAN GIRL

Regained Health and Beauty By the Aid of Pe-ru-na.

CATARRH once fastened upon the human system is liable to invade any part of the body.

In many cases of catarrh of the head

the disease spreads downwards and involves the stomach.

Then it spreads farther downwards into the duodenum and finally passes through the ducts into the liver.

This inevitably produces sluggishness The catarrhal inflammation thickeus

the mucous membranes, and thus clogs up the ducts that are carrying the bile from the liver into the duodenum.

The bile becomes dammed up in the gall bladder and accumulates within

It is then reabsorbed into the blood, producing bilious headaches, general languor, furred tongue, irregular appe-tite, sallow complexions, skin eruptions and, in long standing eases, jaundice.

Miss Louise Moore, 36 McGill St., Toronto, Can., writes:

"I wish to express my gratitude to you for giving to suffering humanity your wonderful medicine, "I was an lavalid from catarrh of

the liver. I was despondent, my skin was sellow. I had a bad taste in my mouth in the morning, my tongue was coated a dark brown (ongue was coated a dark brown)
and my breath was very bad at
times. I was subject to sick headaches and vemiting. My bowels
were irregular and I was wretched.
"I doctored for some time without becoming much better and finally at the suggestion of friends I
tried Peruna. The result was magical and within four months I west

cal, and within four months I was completely cured."--Louise Moore.

Peruna by removing the catarrhal condition promptly mitigates all of these disagreeable symptoms,

### HARBOR IMPROVEMENTS.

will also be submitted to the president of the C. P. R. during his visit here, prior to it being taken before the Trans-portation Commission. The first question that naturally arises in consider-ing the probabilities of a scheme of the kind being accepted at Ottawa and carried out is the cost. Mr. Sorby has kindly furnished us with some figures that are approximate. He estimates that the improvement as suggested will cost \$350,000, which will make a very complete and efficient job of it. He points out that there is considerable land inside the deep-water lines that can be reclaimed by being filled in with the excavated material. To do this well will cost \$50,000 more. In round numbers, therefore, the cost of the improvements in this way will be What the value of the land thus reclaimed would be is very diffi-cult to estimate. Mr. Sorby, however sees another way in which this material can be utilized. There has been a great deal of talk about a breakwater, and the Hon. Mr. Prefontaine minister of marine and fisheries, has definitely promised that if the necessity arises for its construction, and his party is in power at the time, it will be built. In that case, the breakwater would require about 400,000 cubic yards of excavated material that would otherwise have to be specially secured. Mr. Sorby points out that the excavating necessary in the pro-posed improvements would render would render available about 1.713,000 cubic yards of material, part of which could go into the breakwater and part into the filling up of land to be reclaimed This would be killing two birds with one stone, and doing very useful work The whole question depends upon the necessity which exists for the work being done, and whether the value of the improvements would justify the expense. That the bettering of the harbor is greatly needed, no one will deny, and when we consider the

Sir Gilbert Parker, on his return to Toronto from the West, gave an interview to a Toronto reporter. A portion of it dealing with the danger of the Northwest becoming Americanized and going out of Confederation is as follows: "I don't anticipate the least trouble. To begin with, about 50 per cent. of Americans are either foreign-born or Last year the preponderance of American over British immigrants into the Northwest was 20 per cent. This year it will probably be 50 per cent. But a settler who has made his home in a new country will could ever secede from between loyal British Columbia and loyal Manitoba position from Eastern Canada and England. And as to a desire for cheaper machinery, I am quite sure that a settler will never go into battle for the sake of a self-binder." t "But Ralph Connor has said that

### MR. MARTIN'S LATEST MOVE.

Mr. Joseph Martin is a man of toba on a new mission-the formation of a third party in politics. Though a life-long Liberal, he has lost all faith in his party and especially in its leader, Sir Wilfrid Laurter. He has apparently more confidence in the Conservative leader, but thinks the latter lost a golden opportunity at last session. Besides, it would be too big a wrench to his feelings to go straight across and join hands with Mr. Borden. In fact, we do not know but that gentleman feels he has trouble enough now without courting more, and Mr. Martin is altogether too energetic and strenuous in his methods to make an

about the new move, that Mr. Martin has always shown himself prescient in politics, and has on more than one occasion scored by striking the iron while it was hot. His efforts in abol ishing separate schools in Manitoba in making the question a factor in defeating the Liberal-Conservatives in 1896, and his coming to this province and entering the arena at the psychological moment, are instances of fore sight and ability to take advantage of a situation. That he is now going back to his old stamping ground for the purpose of forming a new party is an evidence of the way the wind is blowing. He sees the disintegration of the Liberal party at hand, and will be in if possible at the downfall. To The Daily Colonist is on sale at News

> Seventy million dollars in cold cash for its lands in the Northwest was a tempt ing offer to be refused by the C. P. R. In the interests of the country, however it would be better that the land should remain with the company and be sold by it, instead of by a syndicate of private individuals.

The St. John Sun, discussing the poli tical situation in the new provinces,

says: There will be no dissolution of the house of assembly, for the Northwest legislature will have been dissolved by federal statute. It will be the duty of the original and provisional governments to issue writs for general elec-tions. These elections will give the provinces a responsible government, for if the provisional administration is not sustained it must disappear in favor of one supported by a majority of the mem-bers-elect. One would expect that pending the first elections the provisional government would not undertake to make permanent appointments, or that any appointments so made would be subject to approval by the responsible administration.

By a majority vote of the two orders the lower house of the General Synod or Canada, at Quebec, recently passed t motion of concurrence with the canot on divorce adopted by the House of By this canon no clergyman within the jurisdiction of the Church of England in Canada shall solemnize a marriage between persons either of whom shall have been divorced from very large sums which are spent on the eastern coast, along the St. Lawone still living at the time. This step was taken to free clergymen from the rence River and on the lakes for the responsibility of acting individually There was a very long and spirited de bate on the subject, the motion being finally carried by 55 clericals for to 8 Much was stated respecting against. the lax divorce laws in the United States, and while the question of divorce in Canada was not a serious one yet, as one clergyman expressed it, "our neighbor's house is on fire," and they wished to avoid danger.

We have been favored by the publish er, Wm. Briggs, Toronto, with a copy of the little book, entitled, "Roberts and the Influences of His Time," being num ber I of a proposed series of studies in Canadian poetry. The author is James Cappon, M. A., professor of English language and literature in Queen's University, Kingston, He regards Roberts as undoubtedly he is, as a many-sided and versatile poet, whose work "belongs and versatile poet, whose work 'belongs too much to the region of artistic experiment," but capable of things even heter than he has given us you. yet seriously devoted himself to singing n loyar Ianitoba in the deepest and truest moods. Mr. strenu Cappon's criticism is a scholarly analyhis treatment the studies in Canadian poetry will form an interesting chap ter in our literature, and will be valuable upon which to base an estimate of its comparative value.

> John Burns, the labor leader, has been in Toronto and has been interviewed and entertained to up end. He left the im pression of being candid, outspoken. honest, strong and aggressive without being offensive, and of bigness mentally and physically. Concluding a long in terview in the Toronto News there i the following of rather special interest "If he said a word to Canadians is would be that they should strive for hon or in commerce, industry in labor and incorruptibility in public life. By attaining these ideals only would they the high place which nature in tended for them. After his trip through the country he would speak freely and frankly, and in a kindly and sympathetic way would summarize the results The people of Great Britain, irrespect ive of parties, would, he knew, assist Conadians in every effort of theirs to make the country a better place to live in, because they must remember that before factions made them partisans Nature made them men.

Mr. Sanders, sergeant-at-arms, returned to the Interior without being called upon to appear at Nanaimo to give evidence in the impersonation case It will be remembered that he was the person referred to as "the wee mannie in connection with the Alberni elections A great deal was said about him in the press, of a very unpleasant character, and wide circulation was given to the agreeable partner. poena, at, we understand, his own expense. The trial did not proceed there and was transferred to Nanaimo. Notwithstanding all that was said of Mr. Sanders' connection with the case, the prosecution discovered that they did not want him after all, and after waiting for some days he returned to the Interi-He has been altogether the sub ject of very shabby treatment. Those who maligned him, for no other reason than that he was a friend of the chief commissioner, have not had the manliness to offer an apology or to acknowl edge that an injustice had been done

The Montreal Herald has an interview with one of the Federal ministers given at Winnipeg in which there is a reply to criticisms directed against the proposed G. T. P. route. We should qualify that tremark by saying that it is intended as entire evasion of the main issue that has been raised, that the Grand Trunk Pacific was intended and promised to be a colonizing road, to open up new territory and not expressly to come into competi tion with existing lines of railway. We are told that "the country wants the road," which is quite true, but it wants it as it was promised. The minister thinks "it is unfortunate that these attempts to stir up ill-feeling against the Grand Trunk Pacific should be made." With the Grand Trunk Pacific the press that has been making the criticism has no quarrel. The Grand Trunk Pacific no quarrel. is a corporation brought into existence to make money. No one will blame it for doing everything legitimately in its pow-er to achieve that object. The fault is er to achieve that object. The fault is with the government that is responsible for the arrangements under which the railway is proposed to be built.

INCREASING VALUE OF WESTERN FARM LAND.

INCREASING VALUE OF WESTERN FARM LAND.

The Denver Republican points out in an editorial that the farmer has been making money at a rate that makes the small business man and mechanic envy him, and more and more the mind of the people is turning back to the land. Increases in value of from 25 to 50 per cent. In the last two years in the regions of the Mississippi valley, through Kansas, Nebruska, Missouri, Illipois and Iowa in particular. Even worn-out lands that have produced practically nothing for years have suddenly come into command and find buyers in men who intend to again put them under production. In the irrigated sections of Colorado lands that two years ago were selling at \$40, \$50 and \$60 an acre are now going at \$100 and \$125, and even ashigh as \$250 has been paid for Greeley lands within the month. In these sections sales agresticted in number by the fact that even the higher prices fail to tempt many farmers into selling; they say that they would not know what else to invest their money in that would pay them such good returns as do the farms, even at double the prices of two years ago. It is not extraordinary to clear \$50 an acre a year on beet lands, and this would be 10 per cent. a year on lands at \$500 an acre, a price to which it is predicted the best lands in these sections will go in a few years.

Highly Commended.—No band that ever visited Toronto evoked the enthy sism won by the band of Irish Guards, that fine musical organization that comes here next Monday and Tuesday. Here is a sample tribute, from the Toronto World of August 30th last: "Other family hands which have been at Toronto exhibition must fade away in comperison of popularity. One number which captivated the listeners, in which the private the cornet soloist occupied a position on the baleony of the administration building a couple of hundred yards away from the bandstand had a marvelous effect upon the thousands of people in the grounds. The din was hushed. From all points folks directed their steps to yard the musicians. The notes of the orner rang out clear, and when the misc subsided there was a spellbound signer or a few seconds, followed by a carfening cheer, which placed the hand of the Irish Guards in the hearts of the distors to the exhibition."

### FOOTBALL. Victorias Organize

Victorias Organize

The prospects for a good football season were discussed at length last evening at the annual organization meeting of the Victoria United Football Club, which was held in the Y.M. C. A. The meeting was a very enthusiastic one, all present taking a great interest in the discussion. The outlook for the season was talked over and appeared very bright. The players are all determined to go into the game with the intention of gaining their lost prestige—the championship cup. The meeting was presided over by Rev. W. W. Bolton, who was president of the club last season. The report of the secretary-treasurer was read, which showed the club to be in a good financial condition, having a nice balance on the right side. The officers for the ensuing season were elected as follows: President, J. A. Virtue; vice-president, Dr. J. Gibbs; secretary-treasurer, T. G. Wilson; executive committee, J. S. Thompson, J. Hart, A. Peden, J. W. Lorimer; captain, H. A. Goward; vice-captain, L. York; selection committee, H. A. Goward, L. York and J. Eyres; official linesman, R. Lorimer; referees to be nominated at the meeting of the league, F. Richardson and R. J. Fell; delegates to the Victoria District league, H. A. Goward. delegates to the V league, H. A. Goward.

Among those present were several new players, who have signified their intention of trying for a position on the team. With the large number of the team. With the large number of contestants for positions, the regular members will have to look to their work if they intend to hold their positions. It was decided that regular practices should be held during the season, as in their way the team could only hope to make a showing in the championship race. The first practice has been called for Saturday afternoon at Oak Bay, at which a large turnout is expected. After discussing a few minor details the meeting adjourned.

### AUTOMOBILING.

### The First Meet

The First Moet

The first automobile meet to be held in this city took place at the Driving Park yesterday, and proved a great success. Although the postponement of the races from Saturday caused several of the Sound machines to return home, the races were exciting. The events, with the exception of the obstacle race, were all run off and were very closely contested. There was a fair attendance for a week-day afternoon, and all were well pleased with the sport.

The first race on the programme

afternoon, and all were well pleased with the sport.

The first race on the programme was a two-mile motor cycle race in which there were three entries—Langworthy, on an Indian machine; Callahan, on a Rover; Schulley, on a Mitchell. The race was very close for the entire distance, and was won by Langworthy, with Callahan second, in the very fast time of 4 min. 2 sec.

The next race was for rumabouts, a distance of one mile, in which there were two entries—Dr. Verrinder, in his Cadillac, and E. Ferris, driving D. Boscowitz' Cadillac. The two machines got away well together, Ferris taking the lead shortly after the start, with Verrinder chasing him close, the former winning with about ten yards to spare, in 2 min. 12 sec.

The two-mile heavy touring car race brought out Virgil Hall in a 40 h. p. Thomas, and E. Ferris in a 24 h. p. Winton, belonging to Mr. D. Boscowitz. This race was one of the most excit-ing of the whole day. Exeris took

Thomas, and E. Ferris in a 24 h. p. Winton, belonging to Mr. D. Roscowitz. This race was one of the most exciting of the whole day. Ferris took the lead at the start and held it for the first lap, when Hall jumped in and led for the second and third, but Ferris, not to be outdone, let out another notch and beat him by about five yards, in 3 min. 33 1-5 sec.

The next was an exhibition halfmlle on a bicycle by Virgil Hall, champion bicycle rider of the Coast. The rider was to be paced by a motor cycle, and he endeavored to lower the record for the Pacific Coast. Callahan on a Rover eycle came out to pace him. Both got off at a good clip, but it was quickly seen that the pacer was not fast enough for the bleycle rider. Hall rode a very fine race, but was decidedly handleapped by the pacing. He did the half in what is considered very good time for the track. Time, 1:06 4-5.

The pursuit race afforded more extitement than any other race on the

track. Time, 1:06 4-5.

The pursuit race afforded more excitement than any other race on the programme. There were three entries—F. A. Bryant, in a 12 h. p. Franklin; Virgil Hall, in the Thomas; and Ferris, in the Winton. The Thomas was started in the front of the grandstand, with the others having a start of a sixth of a mile each, which put the Winton between the Thomas and the Franklin. In this race

MAY attack you at any time of the year, but it is more prevalent during the summer months. When this trouble attacks you, it does not pay you to experiment with untried remedies, but always procure one that has stood the test of time. Such a one is Dr. Fowler's Extract of Wild Strawberry. It has been or the market for 60 years and is considered by thousands of people as the best cure for all bowel com-

all the cars were started at the same time, with the intention of overtaking the car in front. The car that allowed the other to pass was then declared the loser. From the start it was seen that the Franklin was going to make its opponents go some if they intended to win. Bryant, who drove the Franklin, showed at all times that he had complete control over the machine and drove it for all he was worth, with the result that he soon began to overhaul the Thomas. The latter gradually crawled up to the Winton, and it was soon a question whether the Thomas would pass the Winton before he was passed by the Franklin. The latter proved the case, Bryant passing the big machine in the tenth lap, while it took just one more for it to pass Ferris, which gave the Franklin the race, with the Winton second, after the Franklin had covered about six miles. The best time of the afternoon was also made in this race—one mile being caught at a little less than a minute and a half.

The same cars were entered for the free-for-all for one mile. Ferris went off at the start in good style and held the lead for the first lap, but in going around the upper turn he lost his tire, which threw him out of the race after he had secured a lead which it would have been hard for his competitors to overtake. The Thomas won, with the Franklin very close behind, in 1:47 2-5. The big race of the day then took place—a match race between the Thomas and the Franklin for a purse of \$500. Both machines got away together and went at it from the start. The Thomas took the lead and held it for the first lap, but the Franklin was

The Thomas took the lead and held it for the first lap, but the Franklin was on even terms in the second round, only to have the Thomas take the third. The nevt lap saw the Franklin about a foot ahead and increasing the lead, which it held till the eighth, the third that the third took the big machine to the front, but he was unable to hold owing to the terrific rate at which the Franklin was being driven by Bryant. Coming in to the stretch for the last lap, Hall made a hard struggle to win, but was unable to get in, the Franklin winning by about ten yards in St.4, which is an average time of 1:38 for every mile.

It was deedled to cut out the obstacle race, and the half-mile high-gear slow race was called next, which brought out Dr. Verrinder and Ferris, with Cadillacs, and Todd and Hutchinson with Oldsmobiles. A Judge had to accompany the drivers, in order to see that everything was carried out correctivity, and after the machines had all stopped with the exception of Ferris, who returned to the starting point instead of making the full lap, which disquified him, no prizes were awarded.

The last face was the two-mile light touring car, in which Dr. Verrinder and R. Troup were the contestants, the former in a Cadillac and the latter in a White steam car. Troup took the lead and held it for one lap, when the steam ran out and was unable to finish, Verrinder doing the distance in 4:17.

This brought the meet to a close, every one yoting it to be a good beginning,

This brought the meet to a close, every one voting it to be a good beginning, and hoping for a larger attendance at the next one. The officials for the day were: Starter, E. Sippell; judges, Steve Jones, L. G. Quagliotti and Dr. R. H. Carter; time keeper, A. J. Dallain.

Food.

Every nerve and every muscle of the body depends on the blood for nourishment. Thin, watery blood makes weak nerves and flabby muscles. The heart falls in its work of forcing blood through the body; the lungs, the stomach, the liver, kidneys and bowels all do their work in an imperfect way, and you drag about, weak, tired and miserable.

The use of Dr. Chase's Nerve Food makes a radical change in every human system that is starved and impoverished for want of rich, pure and life-sustaining blood.

Gradually, certainly and naturally it instills new vigor into every nook and corner of the body, restores health and vitailty, and puts a new joy lato life.

New York, Sept. 18.—The advancing tendency of prices which held through last week was continued in tonay's stock market. The movement did not persist in full vigor throughout the day, as it was interrupted by occasional halts and reactions; but there was no actual reversal of the course of prices. The day was without special incident in the way of news, but advices from all quarters were corroborative of the extraordinary prosperity privilege in all parts of the country and in all lines of business. The money market offered no obstacles. Those who were operating in the market for higher prices are satisfied apparently so long as the increase of the country and in the legal reserve can be effected by the relieving operations of trust companies. The extent to which this process is the legal reserve can be effected by the relieving operations of trust companies. Immediate concutions if the legal reserve can be effected by the relieving operations of trust constitution. Immediate connections in the market was less than in the corresponding period of last week, and New York exhauge rose to par, indicating the lessened demand upon New York banks. At the same time sterling exchange fell away to a lower level and local banking houses were in the market in London some part of the incoming supplies gold. These negotiations were not successful as the arrival or gold from India were reserved against the Indian currency. The price of gold was marked up in the local market, and discounts there and in Berlin harden. To Present Medals

The medals which were won by the St. Louis college baseball team in the junior league will be presented tomorrow evening at 8 p. m. The presentation will take place in the Y. M. C. A., R. Hall, M. P. P., having kindly consented to present the victors with their trophies. A very fine programme has been prepared, to be rendered in connection with the presentation. This team has for the season made a very good record, winning six out of the eight games played. A cordial invitation is extended to all interested in sports, and those in charge hope that there will be a large turnout to encourage the youngsters. gadd was marked up in the local market, and discounts there and in Berlin hardenced an additional fraction. The London market is looking forward to a further rise in the Bank of England's rate, and speculations there were consequently restrained at one time during the day. The momentary strengthening of stocks necessarily gave place to some re-selling when the rumor was found to be incorrect. The unbridded manner of the first spurt in Reading had a disturbing effect on speculation. The movement in C. P. R. was regarded as coming from the same source as that in Reading. Call money was not held at the maximum level of Friday, but ruled above last week's level. Sterling exchange moved up from the low level in the afternoon. The closing tone of stocks was irregular; total sales par value, \$2,670,000.

U. S. Bonds were unchanged on call.

It is with pleasure that I give you this insolicited testimonial. About a year ago when I had a severa case of measles I got unsolicited testimonial. About a year ago when I had a severe case of measles I got caught out in a hard rain and the measles settled in my stomach and bowels. I had an awful time and had it not been for the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy I could not have possibly lived but a few hours longer, but thanks to this remedy I am now strong and well. I have written the above through simple gratitude and I shall always speak a good word for this remedy.—Sam H. Gwin, traveing salesman for Concord

### Acapulco to Come Under Hammer

Capt.McLean's Notorious Scale Will Be Sold to Satisfy Claims Against Her.

Beacon Rock With Cargo for Victoria Putsinto Port Star.ley in Distress.

The sealing schooner Acapulco, or Car-mencita, or Jennic Thelin—she has been known as all three within the past three rears-will be sold under the hammer, It years—will be sold under the hallmer. It is probable that the sale will take place within a few days. The vessel is being sold to satisfy the claims of her crew against her for wages. A few days ago six hunters began libel proceedings against the vessel to recover \$1.094, the amount of wages due them under agreements made with Capitaln McLean, by which they were to be para three dollars for every skin taken. Several others of the crew remaining on board are contemplating proceedings. Mr. Wilson, the San Francisco steve dore, who is now in Victoria in the Interest of R. de Smidt, the present owner of est of R. de Smidt, the present owner of the vessel, wishes to wind up the business of the schooner, and it is understood that he seeks to larve the vessel disposed of to satisfy the claims against her.

The Acapulco—she is at present without a register or flag, the Mexican papers given for a voyage to Acapulco having been selzed by the local customs, by whom the vessel was fined \$1,600 a few days ago. If she is bought at the forthcoming sale by local shipping men it will be necessary for them to pay duty before a local registry can be secured.

The schooner is an old one. Thirty-one years ago, when known as the Jennie Thelin, she struck on the bar when trying to sail into Coos bay, and was beached on North spit. She was then owned by Reedie & Co. of San Francisco, by whom she was insured for \$8,000. The wreek was purchased from the underwriters by

GLENALVON ASHORE.

Sailing Ship En Route to Royal Roads Stranded on Japanese Coax.

The British ship Glenalvon, which sailed from Yokohama on August 2 for Royal Roads, is ashore on Saratoga spit, on the Japanese coast. The Glenalvon encountered the typhoon in mid-August and was driven ashore. She was still ashore on August 18, when the last advices were received. It is not thought the vessel will be seriously damaged, however, as the shore is muddy where she lies stranded, and the vessel is practically lying on a mudbank. The Glenalvon is British ship of 1.980 tons, commanded by Capt. Andrews. She was coming to Victoria in ballast for orders. The Glenalvon has been here before several times, having carried salmon to England on one occasion.

The French ship Allee, from Hobart for orders, was picked up off the Cape on Sunday by the tug Sea Lion and towed to Port Angeles. The Sea Lion and the wester is practically lying again and on one occasion.

Wreck Sighted Off Alaskan Coast Believed to Have Been That Vessel.

Little doubt exists among seafaring men that the three-masted schooner which was first sighted floating bottom up and later seen ashore on the beach near Yakutat Bay, Alaska, by Japansese sealers, was the schooner Pearl. The fact that the body of George Fermerling, who shipped as cook aboard the vessel, has been fully identified adds to the belief that the wreck is that of the Pearl. It is the belief that the Pearl capsized off Sanak Bay and later drifted to where she was seen.

Although a staunch little vessel, the schooner had the name of "uniucky" samong seafaring men. Capt. William; Kessel, who is now in command of the ship Occidental, which sailed from Seattle a, few weeks ago, was once wrecked in the same vessel.
